Art Unit: 1752

This application is before the examiner for consideration.

- A. In view of the complexity of the claims as set up this Office action is made.
- B. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Two sets of the groups of independent material claims (1-19) and (20) (with the independent claim 20 as the main invention are not considered to be patentably different or distinct. Therefore, no separate consideration or search will be made. Accordingly, no restriction among them is made on the record. Should applicant show or urge otherwise in the next response to this Office action in order for it to be considered timely, a restriction will be made for the record as shown or urged), drawn to a single invented material, classified in class 422, subclass 298.
 - II. Claim 17-31, drawn to a method, classified in class 422, subclass 26.

Inventions Groups (I and II) and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the sterilizing process as claimed can be practiced by another materially different apparatus such as use a solution containing a sterilizing agent which would be obtained about the same

Application/Control Number: 10/052,048

Art Unit: 1752

sterilizing result. Applicant should show or provide an evidence to the contrary. In the absence of convincing evidence, the restriction would not be removed.

Because these inventions are distinct for the reasons given above and have acquired the separate status and searches in the art and can be supported the separate patents as divided by applicants and have no evidence of the record that are not required the separate consideration and search since they are the obvious variants because the prior art being applied to one of them would be sufficient against all inventions, restriction for examination purposes as indicated is proper. Applicant should show or provide an evidence to the contrary. In the absence of convincing evidence, the restriction would not be removed.

- D. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- E. However any process claim is permitted to be rejoined with a material claim provided (a) that the material claim is allowable and (b) the process claim must be contained all of the limitations of the allowable material claim in accordance with the authority stated in In re Ochiai, 37 USPQ2d 1127 or In re Brouwer, 37 USPQ2d 1663 and MPEP 821.04.

Application/Control Number: 10/052,048

Art Unit: 1752

F. Other issues have not been considered until a proper election is made and resolved.

G. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Hoa V. Le whose telephone number is 703-308-2295. The

examiner can normally be reached on 6:30AM-5:00PM, M-TH.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Janet Baxter can be reached on 703-308-2303. The fax phone numbers of the

examiner is 703-746-7172. Since there is a newly electronic filing procedure for all initial

communicating papers and all responses to an Office action, the examiner fax phone number is

not for use to receive any fax in response to an Office action. Applicant is requested and required

to send all initial communicating papers and all response to Office action to a central paper or

fax receiving center for an electronic scanning procedure.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is 703-308-0661.
